Portfolio | LinkedIn | GitHub

EDUCATION

Boston University | M.S. in Applied Business Analytics Expected Jan 2027

Boston University | M.S. in Project Management Jan 2025

University of Massachusetts Boston | Dual Bachelor's Degrees May 2023

B.S. in Management (Leadership & Organizational Change); B.A. in Labor Studies

Coursework: Python & SQL, Marketing Analytics, Data Mining, Generative AI, Project & Risk Management.

EXPERIENCE

Boston University | Graduate Teaching Assistant Sep 2024 - Dec 2025

Project & Change Management

- Evaluated 50+ graduate case analyses and project proposals; reviewed KPI frameworks and financial projections, providing feedback on requirements, assumptions, feasibility, and benefits.
- Led approximately 60 analytical review sessions for 200+ graduate students on project risk, cost estimation, scheduling, and case applications.
- Created reusable status reports, decision logs, and results summaries; organized task-level inputs into milestone plans to support consistent reporting.

Boston University | Special Events Assistant Aug 2024 - Jan 2025

- Supported 23 basketball, swimming, and field hockey events; coordinated inventory, concessions, crowd flow, and closeout, resolving 30+ operational issues.

Boston University | Operations Assistant May 2024 - Aug 2024

- Managed facility opening and closing schedules; reviewed operational records and resolved seven discrepancies to maintain accurate records and venue availability.

ACADEMIC PROJECTS

Intel & NVIDIA Annual Report Text Analysis | Individual Project Fall 2026

- Used Python to extract Items 7, 7A, and 8 from 10-K filings submitted in 2020-2024; trained on 2020-2023 texts and tested on 2024 texts to explore company classification.
- Compared text representations and classification results, including Word2Vec; interpreted language differences alongside financial metrics and discussed model limitations.

Job Posting Analysis with Spark SQL | Individual Project Summer 2026

- Organized Lightcast course data into four linked tables; analyzed salary, remote-work, and geographic patterns with Spark SQL, producing four query outputs, charts, and a written report.

AI vs. Non-AI Careers | AD 688 Team Project Summer 2026

- Collaborated on a Lightcast 2024 job-posting study. The team combined data cleaning, exploratory analysis, clustering, classification, and skill-gap analysis in a shared Quarto project.

SKILLS

Analytics: Python, SQL, Excel, Tableau, Jupyter Notebook; data preparation, visualization, financial analysis.

Business & projects: Requirements analysis, KPI review, stakeholder analysis, risk assessment, milestone planning, status reporting.

Tools & methods: Microsoft Project, PowerPoint, GitHub, Quarto; Spark SQL coursework; Agile, Waterfall, Kanban.

Languages: Mandarin Chinese (native); English (professional and academic communication).
